Mr. John Crogan
P.O. Box 17
Delta, PA 17314

Dear Mr. Crogan,

This is in reference to the Perma Guard Fossil Shell Product that I recently purchased from you. I have used it to "deworm" my seven Newfoundland and two English Mastiff Dogs, I suspected that they were suffering from some internal parasites. Since using this product I have noticed an increase in their weight, and I have not noticed any signs of an infestation of tape worms. I feel that this product, working naturally, and with no harsh chemicals has certainly "Done the job that it was intended for".

I have also used it to control the infestation of Gape Worms plaguing my 130 Emus. Since acquiring these birds in 1991 we have had to periodically give injections of Ivomec to control this problem. Since using the Perma Guard fossil shell flour on their feed we no longer have to give the injections. We feel that this is better for the birds and certainly less hazardous for us.

Thank you

Donna J. Smith
