

To Whom It May Concern:

When I was first introduced to Perma Guard I was dubious about the claims made by the salesperson, but I was ready to try anything.

After the December floods of 1991 the insect problem in Arkansas County, Texas became terrible. I really didn't know what to do about it. We had adopted a small child and I was afraid to use the chemical pesticides we had formerly used and the ants and other bugs seemed to have built up an immunity to them anyways.

I was amazed at the demonstration the salesman from Earth Shield made. He sprinkled a ring of Perma Guard around a fire ant mound, then stirred the mound up and the ants went crazy. Then he poured a mixture of 1 tablespoon of Perma Guard powder and one quart of water into the mound until it was completely flooded. The fire ants shriveled up and died while we watched. I was sold on the product.

I now use all three labels; Household to keep our residence free of the nasty bugs and ants, Garden & Plant on our flowers and shrubs and Pet and Animal to keep our dog free of fleas and ticks.

I highly recommend Perma Guard from Earth Shield to anyone!
