Dear Wally:

Enclosed are a few snap shots of our burro, Ruben, enjoying your wonderful FOSSIL SHELL FLOUR. We were so lucky to have our camera handy--we got shots from 'start to finish'.

When we got him two years ago, he was very undernourished, his coat was thin and patchy and his skin covered with sores. With a good diet and the Fossil Shell Flour, he has regained his health and has a luxurious coat.

All of our horses and burrow love to roll in it. I wish you could hear their happy noises when we spread a new supply. Of course, after rolling in it, they stand and eat it, but, we also have it in a "Free choice" bucket in each pasture.

Even our house pets have it on their dry food--like "frosted flakes" we tell them. We are sure it adds to their nutrition and helps keeps them free of parasites.

Thank you so much for introducing us to the benefits of this great product. NOW!, would you please bring us another order the next time you are coming out. We do not want to be without.

Sincerely,

Mary Ann Ireland  
Bold Venture Ranch
